

Let's count in multiples!

Today we will be:

Counting in twos, fives and tens.

Count to twenty
and back in twos.

Count to fifty and
back in fives.

0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40
	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60

Count to one hundred and back in tens.

									0
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

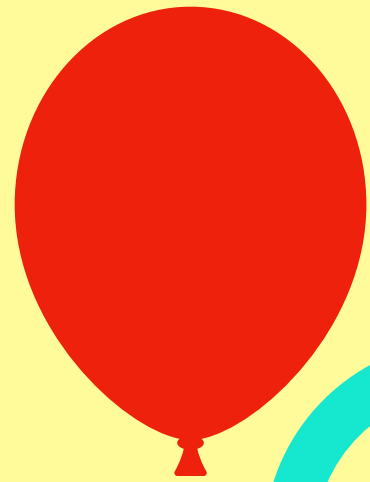

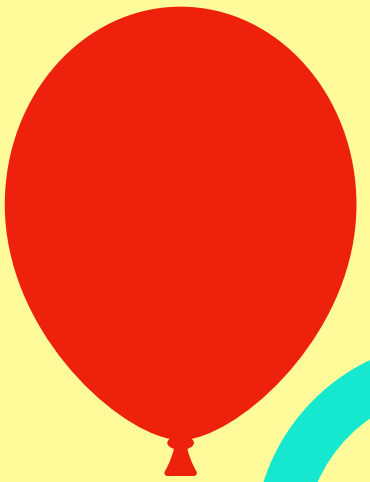

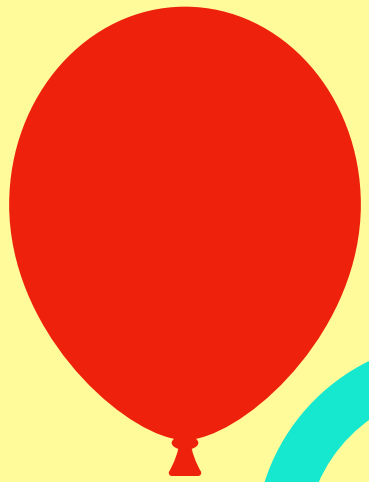

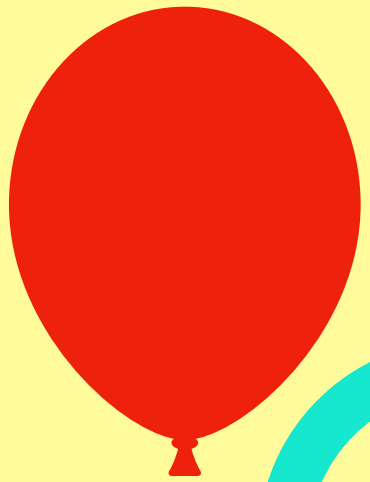

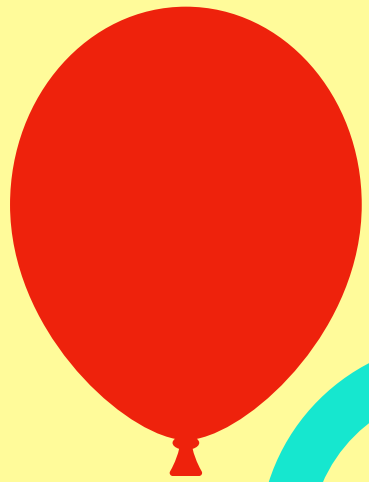

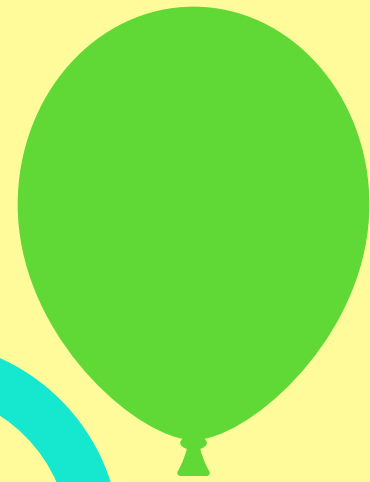

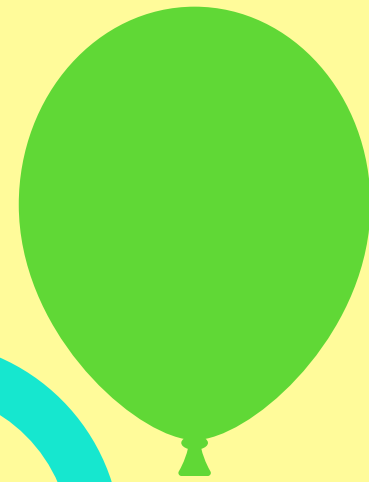

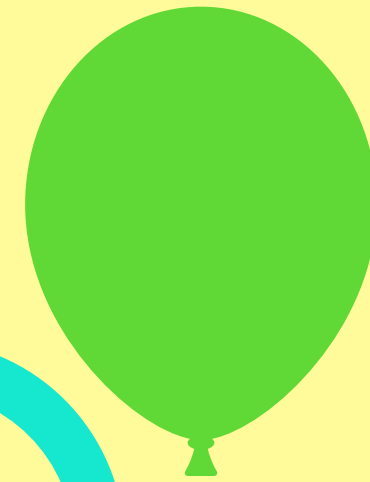

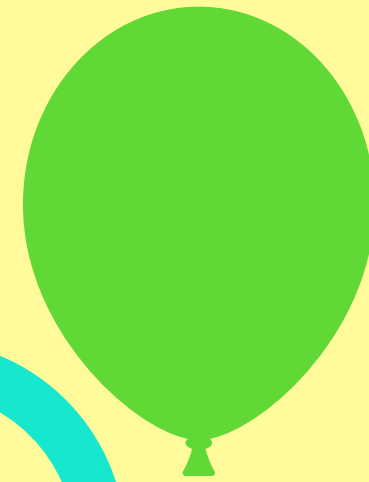

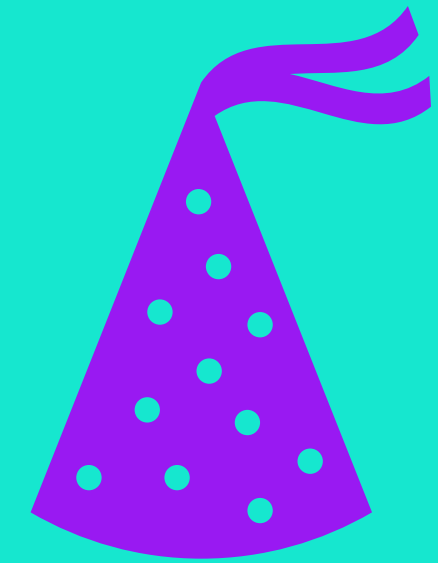

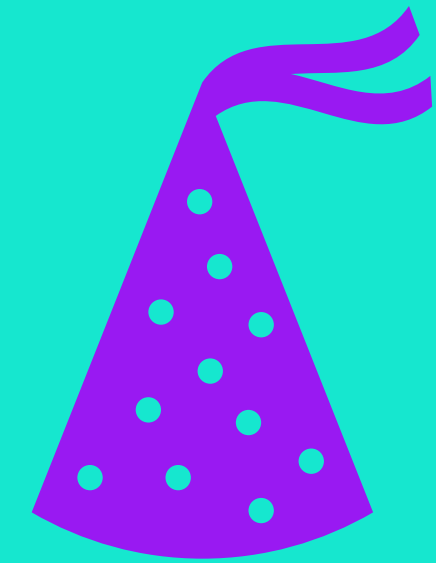

There are two balloons in each party bag. How many balloons are there?

There are ten balloons. Did you count in twos to work out the answer or did you use another method?

2	4	6	8	10
				
				
				
				

How can you write this information as a number sentence?

Blank space for writing a number sentence.

Blank space for writing a number sentence.

There are five bags of two balloons.
 $5 \times 2 = 10$

There are five bags of two balloons.
 $2 + 2 + 2 + 2 + 2 = 10$

We can write the information as a multiplication number sentence or a repeated addition number sentence.

There are five tennis balls in each box.
How many tennis balls are there?

There are forty tennis balls. How did you work out the answer? Now write this as a number sentence.

Which number sentence did you write?
Can you explain the number sentences?

$$5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40$$

$$8 \times 5 = 40$$

There are ten pencils in each pot.
How many pencils are there?

There are seventy pencils. How did you work out the answer? Now write this as a number sentence.

10

20

30

40

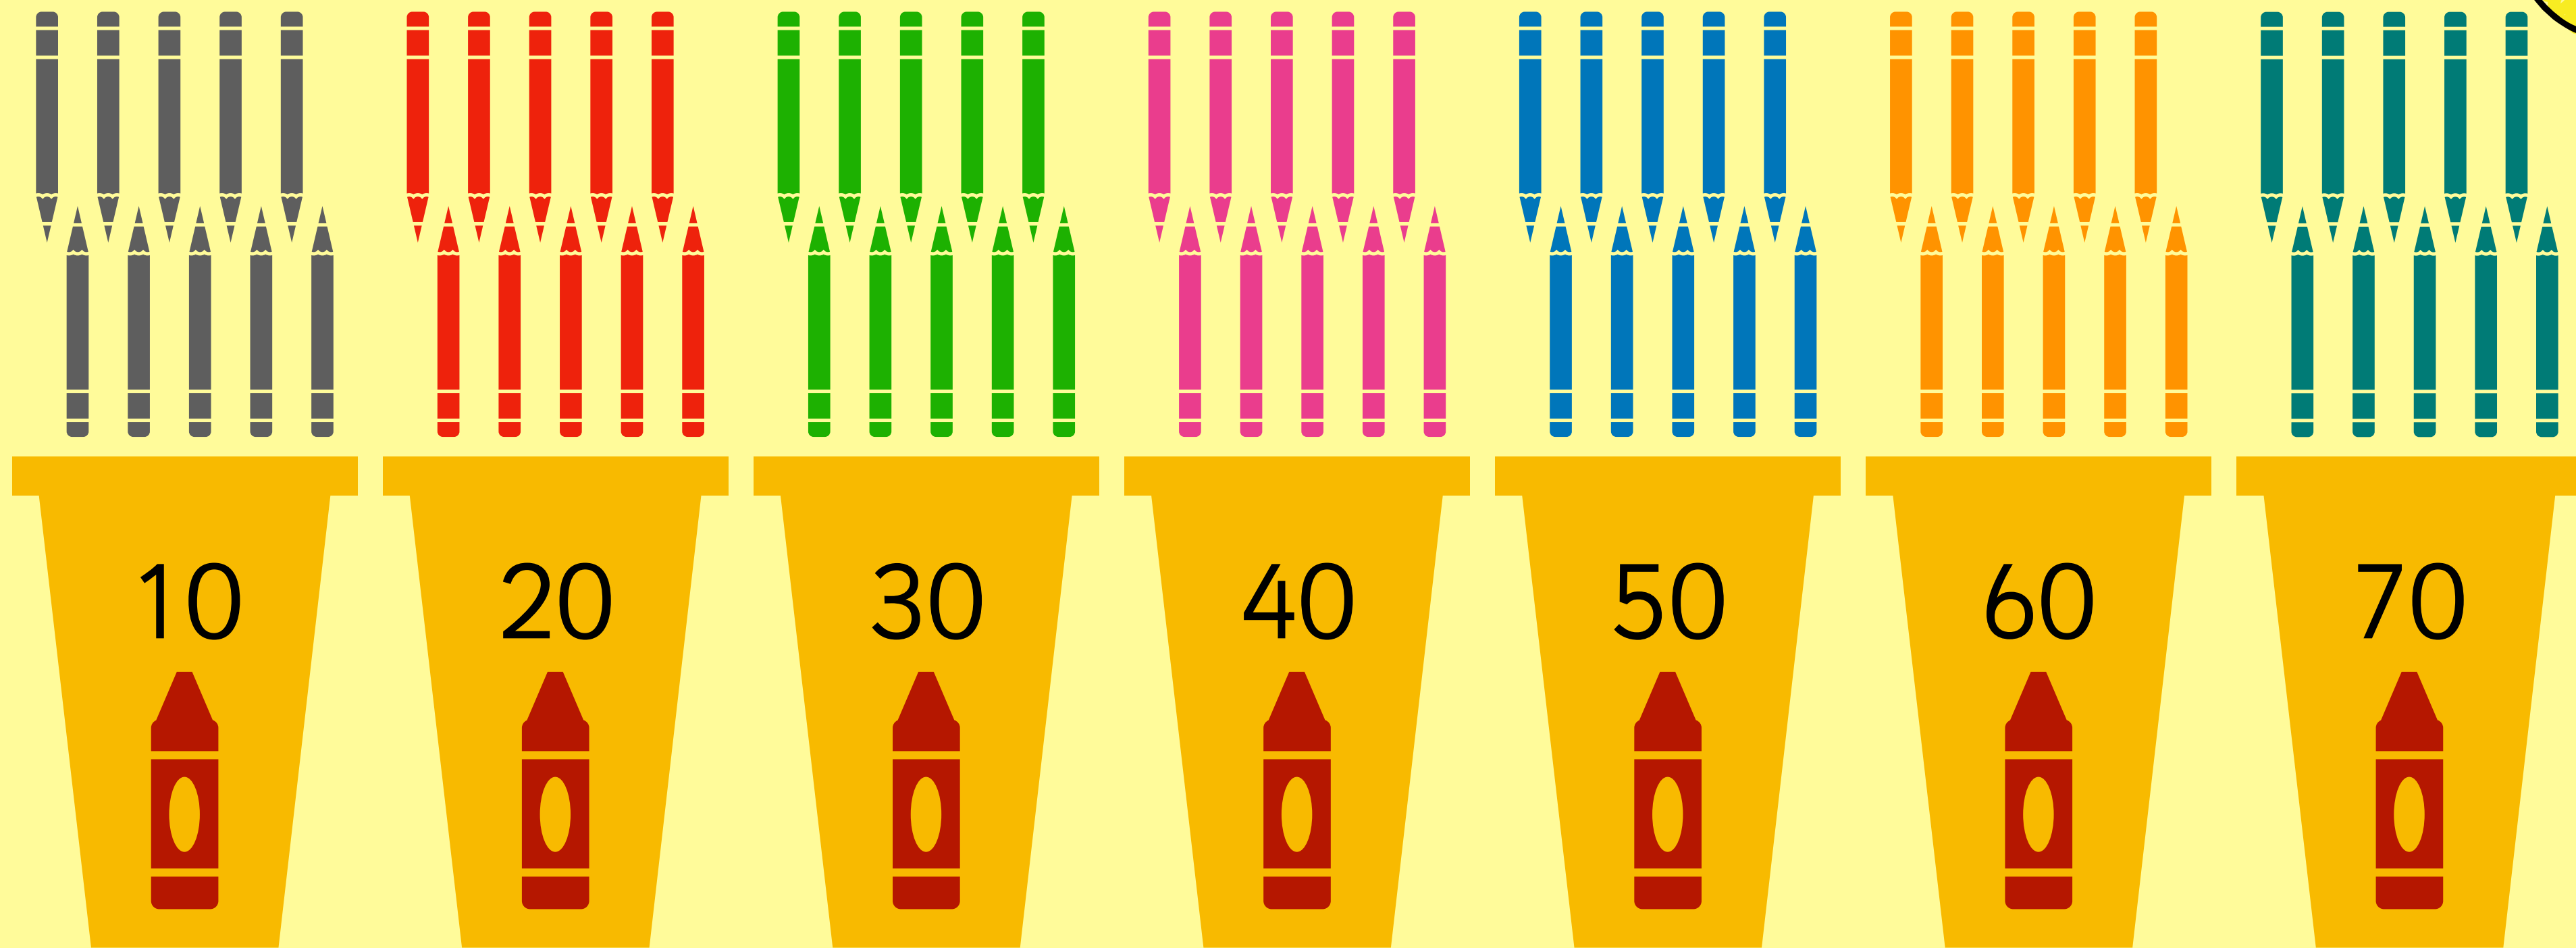

50

60

70

Which number sentence did you write?
Can you explain the number sentences?

$$10 + 10 + 10 + 10 + 10 + 10 + 10 = 70$$

$$7 \times 10 = 70$$

What does this number sentence mean?
How can you solve it?

Think, pair, share.

$$10 \times 5 =$$

It means ten groups of five.
Ten multiplied by five is fifty.

$$10 \times 5 = 50$$

What does this number sentence mean?
How can you solve it?

Think, pair, share.

$$10 \times 10 =$$

It means ten groups of ten.
Ten multiplied by ten is one hundred.

$$10 \times 10 = 100$$
